## The Beauty of the Lawn ADDS TO THE CHARM OF THE HOME

**848 AMERICAN RYE GRASS.** (Arasan Treated) The finest Winter Lawn Grass for the South. It is a fast-growing annual with broad, flat blades of delightful green color. Will produce a beautiful and luxuriant solid carpet of grass within two weeks. Sow at the rate of 1 pound to 75 to 100 square feet. On new lawns a rake can be used in mixing the seed into the surface soil. When sowing on a Bermuda or Carpet lawn the grass should be mowed as closely as possible before sprinkling the seed, and for better germination the lawn should be given a light covering with good soil or Peat Moss. Lb. 35c; 5 lbs. \$1.40; 10 lbs. \$2.00; 100 lbs. \$15.50. Postpaid price: 5 lbs. \$1.75.

**828 ZOYSIA JAPONICA.** This fine-leaved lawn grass will thrive well both in full sun and in dense shade. Because it grows only 3 to 4 inches tall, it requires little mowing. The new strain we are offering grows as rapidly as St. Augustine Grass in warm weather, is immune to chinch bugs and has a tendency to crowd out crab grass. Formerly this grass could not be planted from seed, for seed production was exceedingly difficult; however, much experimentation and laboratory work has now made this excellent lawn grass available to you in its easiest planting form—seed. Full directions for planting with each purchase. Lb. \$4.50; 5-lb. bag \$20.75. Postpaid prices: Lb. \$4.75; 5-lb. bag \$21.25.

**829 FANCY BERMUDA GRASS.** The most dependable Summer Lawn Grass for Southern gardens. Makes a tough, even, clumpless turf that recovers quickly after cutting. Lasts for years and stands long, hot, dry summers without injury. Succeeds on nearly all types of soil. Germinates in 20 to 30 days with proper soil-moisture. Sow at the rate of 4 pounds to 1000 square feet, from March to September. The seed can be sown on top of your winter grass after mowing same closely. Pass a rake over the grass to prevent the fine seeds from sticking to the blades. Although a perennial, the top of Bermuda Grass dies down during cold winters, but will come up again the next spring. Lb. 70c; 5 lbs. \$3.00; 10 lbs. \$4.90; 100 lbs. \$45.00. Postpaid prices: Lb. 80c; 5 lbs. \$3.45.

**830 CARPET GRASS.** Splendid Lawn Grass for the South. Better than Bermuda for poor, sandy soil and semi-shady lawns. It is a perennial, spreading by creeping stems which root at every joint, thus forming a close, compact turf. Germinates in 20 to 30 days if soil is kept properly moist. For a closely matted lawn, sow at the rate of 5 pounds per 1000 square feet from March until July. Like Bermuda Grass, the seed may be sown on top of your winter lawn after close mowing. Reuter offers only stock that has been carefully analyzed for purity and germination by Senior Seed Analysts. Lb. 75c; 5 lbs. \$3.25; 10 lbs. \$5.10; 100 lbs. \$47.00. Postpaid prices: Lb. 90c; 5 lbs. \$3.75.

**826 HULLED BERMUDA GRASS.** Reuter offers extra-fancy Bermuda Grass with the hulls removed, a new process which gives much quicker germination. Under favorable moisture and soil conditions, Reuter's Hulled Bermuda Grass will germinate in 8 to 10 days, almost as quickly as Rye Grass. It is more economical because half the quantity is necessary to sow 100 square feet of lawn. Be sure to specify hulled seed when ordering, as otherwise the unhulled seed will be shipped. Lb. 95c; 5 lbs. \$4.20; 10 lbs. \$7.30; 100 lbs. \$68.00. Postpaid prices: Lb. \$1.05; 5 lbs. \$4.65.

**ST. AUGUSTINE GRASS.** In Florida, and to an ever-increasing extent in New Orleans, the shady lawn problem has been solved by the use of this perennial creeping grass. It is a deep green, broad-bladed grass, creeping by means of surface runners. Somewhat similar to Carpet Grass, except it has a better color and stays green during ordinary winters. Seed is not available, but lawns are established with rooted runners, laid down in parallel trenches about 8 to 10 inches apart and 2 inches deep, with a flat slope on one side and nearly vertical on the other. A bushel will plant from 150 to 200 square feet, depending on how close it is set. Bus. \$2.25; 10 bus. \$20.00, f. o. b. New Orleans.

## MARIGOLD

The mahogany-red petals are edged with a fine line of gold. Brownie produces a generous supply of blooms 2 inches in diameter. The plant habit is dwarf and bush-like. Excellent for bedding and dwarf bouquets. Pkt. 50c.

German Iris

### HOW TO GROW IRIS

German Irises require a well-drained, sunny location. Clay soils should be mixed to a depth of 1 foot with a liberal quantity of sharp sand. Do not plant too deep. The top of the rhizomes should be at ground-level. Use no fertilizer except Bone Meal, about a closed handful to each plant, and after planting, water thoroughly to settle soil. Cultivate the surface after each rain and water only when soil is dry. Remove old leaves as they wither sufficiently to pull them off. Proper distance between plants, 1 foot.

Louisiana Irises do equally well in sunny or partially shaded locations if properly watered. Clay soils should be loosened by spading in a liberal quantity of Peat Moss or you may use Krillium. Plant the roots about 4 inches deep and 1 foot apart.
